PROFESSIONAL SUMMARY

Cricket and Sports Data Analyst with 2.5+ years of experience in ball-by-ball data analysis, live scoring, match coding, player and team performance analysis, sports data operations, and quality control. Experienced in transforming cricket datasets into statistical insights, performance reports, and professional visualizations. Skilled in Power BI, Tableau, Excel, Python, SQL, dashboard development, data validation, and cricket performance metrics. Combines cricket domain expertise with data analytics and sports technology to support actionable performance analysis.

CORE COMPETENCIES

- Ball-by-Ball Analysis & Tracking
- Batting & Bowling Analytics
- Live Scoring & Match Coding
- Data Cleaning & Extraction
- Power BI & Tableau Dashboards
- Advanced Excel Analytics
- Player & Team Performance Analysis
- Partnership Analysis
- Pitch Maps & Wagon Wheels
- Statistical Analysis & Modeling
- Python Data Modeling
- Streamlit App Development
- Match Analysis
- Phase-wise Performance Metrics
- Data Quality Control & QA
- Automated Match Reporting
- SQL Querying
- Sports Technology

PROFESSIONAL EXPERIENCE

Lifease Solutions LLP — Cricket & Sports Data Analyst

2.5+ years of experience

- Performed delivery-by-delivery cricket data coding and analysis, maintaining accurate ball-by-ball match records and contextual information.
- Analyzed batting, bowling, partnership, phase, and player-performance metrics to identify trends and generate actionable cricket insights.
- Supported live scoring and match coding operations, including scorecard verification, data annotation, and match-level quality checks.
- Conducted data quality control, auditing, bug investigation, and validation of cricket datasets in coordination with development and operations teams.
- Worked with analyst squads of 5–6 members to coordinate match-data workflows and maintain consistency across live scoring and analytical outputs.
- Created performance reports, statistical summaries, dashboards, and professional cricket visualizations for player and match analysis.

SELECTED CRICKET ANALYTICS PROJECTS

Rohit Sharma & Shubman Gill — 255-Run Opening Partnership

Partnership analytics case study covering a 255-run opening partnership in 26.2 overs. Analyzed phase-wise scoring patterns, momentum, contribution share, and partnership acceleration. Total: 255 runs off 158 balls.

Sanju Samson & Abhishek Sharma — 142-Run Partnership

Analyzed India's explosive first-wicket partnership using batter side-by-side comparisons, scoring patterns, and powerplay performance. Partnership: 142 runs off 59 balls.

Shafali Verma — Scoring Impact by Pitching Length

Developed a pitch-zone batting analysis examining scoring impact by delivery length, including length-wise metrics and false-shot patterns. Innings: 68 runs off 39 balls.

Sree Charani — 13-Metric Bowling Performance Radar

Created a multivariate bowling performance analysis using a 13-axis radar framework and match performance scorecards. Spell: 4 overs, 20 runs, 2 wickets.

TECHNICAL SKILLS

Analytics & BI: Power BI, Tableau, Advanced Excel, Dashboard Development, Statistical Analysis

Programming & Data: Python, SQL, Data Modeling, Data Cleaning, Data Extraction

Sports Technology: Ball-by-Ball Data, Live Scoring, Match Coding, Automated Match Reporting, Streamlit

Visualization: Performance Dashboards, Pitch Maps, Wagon Wheels, Radar Charts, Cricket Performance Graphics

EDUCATION

Bachelor of Arts (BA) — 70% — Veer Bahadur Singh Purvanchal University, Jaunpur

Senior Secondary (Class XII) — 65% — Board of High School and Intermediate Education

Secondary School Examination (Class X) — 61% — Board of High School and Intermediate Education

CERTIFICATION & WORKSHOP

AI-Powered Sports Analytics Workshop — 15 August 2026

Instructor: Sai Prasad Kagne. Training covered AI-driven data modeling, automated sports metrics, predictive delivery analytics, and modern sports technology workflows.
