KRISHNA NAND YADAV

CRICKET & SPORTS DATA ANALYST | SPORTS TECHNOLOGY ENTREPRENEUR

PROFESSIONAL EXPERIENCE
3+ Years

Location: Ghazipur, UP / Noida, India • **Phone:** +91 7607711590 • **Email:** krishnanandcricketanalyst@gmail.com •
LinkedIn: krishna-nand-yadav • **GitHub:** thekngroup7622-creator • **Portfolio:** krishnanand-portfolio-theta.vercel.app

PROFESSIONAL SUMMARY

Cricket and Sports Data Analyst with **3+ years of professional experience** specializing in ball-by-ball match coding, live match operations, video tagging, performance analysis, and data quality assurance. Proven track record in deconstructing complex match dynamics into actionable intelligence, diagnostic indicators (false shot inducement, dot-ball pressure, phase momentum), and broadcast-grade visual analytics. Highly proficient in Power BI, Tableau, Excel, Python, and SQL. Founder of **CricNexora** (AI Cricket Analytics) and associated with **NexaPeak Digital Tech Solutions**. Open to international cricket analytics contracts, remote analyst positions, and sports technology collaborations.

TECHNICAL SKILLS & DOMAIN EXPERTISE

Cricket Analytics:	Ball-by-ball data coding, Player performance analysis, Match analysis, Video tagging & synchronization, Live scoring operations, Cricket data quality control (QA), Pitch mapping & wagon wheels.
Business Intelligence:	Power BI, Tableau, Advanced Excel (complex modeling & lookup formulas), Data visualization, Interactive dashboard development, 13-Metric bowling radars, Automated match reporting.
Programming & Data:	Python (Pandas, NumPy, Matplotlib), SQL Querying (PostgreSQL, MySQL), Streamlit web apps, Data extraction, cleaning & validation pipelines, Statistical modeling.

PROFESSIONAL EXPERIENCE

Principal Cricket Analyst — Lifease Solutions LLP (Noida, India) November 2023 – Present

- **Live Match Operations & Squad Leadership:** Lead squads of 5–6 cricket analysts across domestic and international match shifts, ensuring continuous coverage, zero scoring lag, and strict adherence to ball-by-ball tagging protocols.
- **Granular Delivery Coding:** Perform live ball-by-ball event logging capturing release coordinates, pitching line and length, seam/swing deviations, batter footwork, shot choices, and fielding outcomes.
- **Data Quality Control & Video Tagging:** Audit live scoring streams against broadcast video feeds to reconcile anomalies, correct scorecard discrepancies, and ensure zero-defect data delivery to downstream consumers.
- **Tactical Metric Derivation:** Calculate derived performance metrics including false shot inducement rates, dot ball pressure indices, boundary percentages, and phase-wise acceleration curves (Powerplay, Middle, Death).
- **BI Reporting & Dashboards:** Build automated Power BI and Tableau match reports, tournament recap sheets, and player profiling decks used for performance evaluation and strategy.
- **Engineering Collaboration:** Interface directly with engineering and product teams to report data pipeline bugs, test platform scoring enhancements, and validate new feature deployments.

FEATURED CRICKET ANALYTICS CASE STUDIES

Rohit Sharma & Shubman Gill — 255-Run Stand

GUWAHATI · 255 RUNS OFF 158 BALLS (26.2 OVERS)

Phase-by-phase partnership momentum analysis. Boundaries generated 180 runs (70.6%) with 75 rotation runs (29.4%) and 69 dot balls (43.7%). Contribution: Gill 145 (56.9%), Rohit 101 (39.6%), Extras 9.

Abhishek Sharma & Sanju Samson — 142-Run Stand

HYDERABAD · 142 RUNS OFF 59 BALLS (9.5 OVERS)

Extreme scoring rate investigation. Abhishek delivered 108 off 34 balls (SR 317.65, 76.06% share) alongside Samson's 34 off 25 (SR 136.00). Stand yielded 112 boundary runs (78.87%) with only 6 false shots (10.17%).

Shafali Verma — Pitch Length Impact Analysis

WOMEN'S ASIA CUP 2026 · 68 RUNS OFF 39 BALLS (SR 174.36)

Delivery length scoring distribution. Full length deliveries yielded 36 runs off 15 balls (SR 240.00, 13.33% false shots) while good length generated 25 runs off 19 balls (SR 131.58, 26.32% false shots).

Sree Charani — 13-Metric Bowling Radar

WOMEN'S ASIA CUP 2026 · 4-0-20-2 VS INDIA

Multivariate 13-axis radar profiling. Delivered 54.17% dot balls (13 dots), 58.33% false shot inducement rate, 16.67% wicket rate, and 40.00% boundary runs conceded with zero extras.

SPORTS TECHNOLOGY VENTURES & PLATFORMS

CricNexora (**cricnexora.vercel.app**) — AI-powered cricket analytics platform delivering real-time match intelligence, ball-by-ball delivery tracking, interactive pitch landing maps, and 360-degree wagon wheels.

NexaPeak Digital Tech Solutions (**nexapeakdigitaltechsolutions.com**) — Technology venture focused on sports data architectures, executive business intelligence dashboards, and custom software solutions.

EDUCATION & PROFESSIONAL CERTIFICATION

Bachelor of Arts (BA) — Veer Bahadur Singh Purvanchal University, Jaunpur — **70%**

Senior Secondary (Class XII) — Board of High School and Intermediate Education, UP — **65%**

Secondary School Examination (Class X) — CBSE (Central Board of Secondary Education) — **61%**

AI-Powered Sports Analytics Workshop — Hands-on training in sports predictive modeling and automated metrics by Sai Prasad Kagne (Aug 2026) — **Certified**
